

Pelican Beach Club House Floor Plan

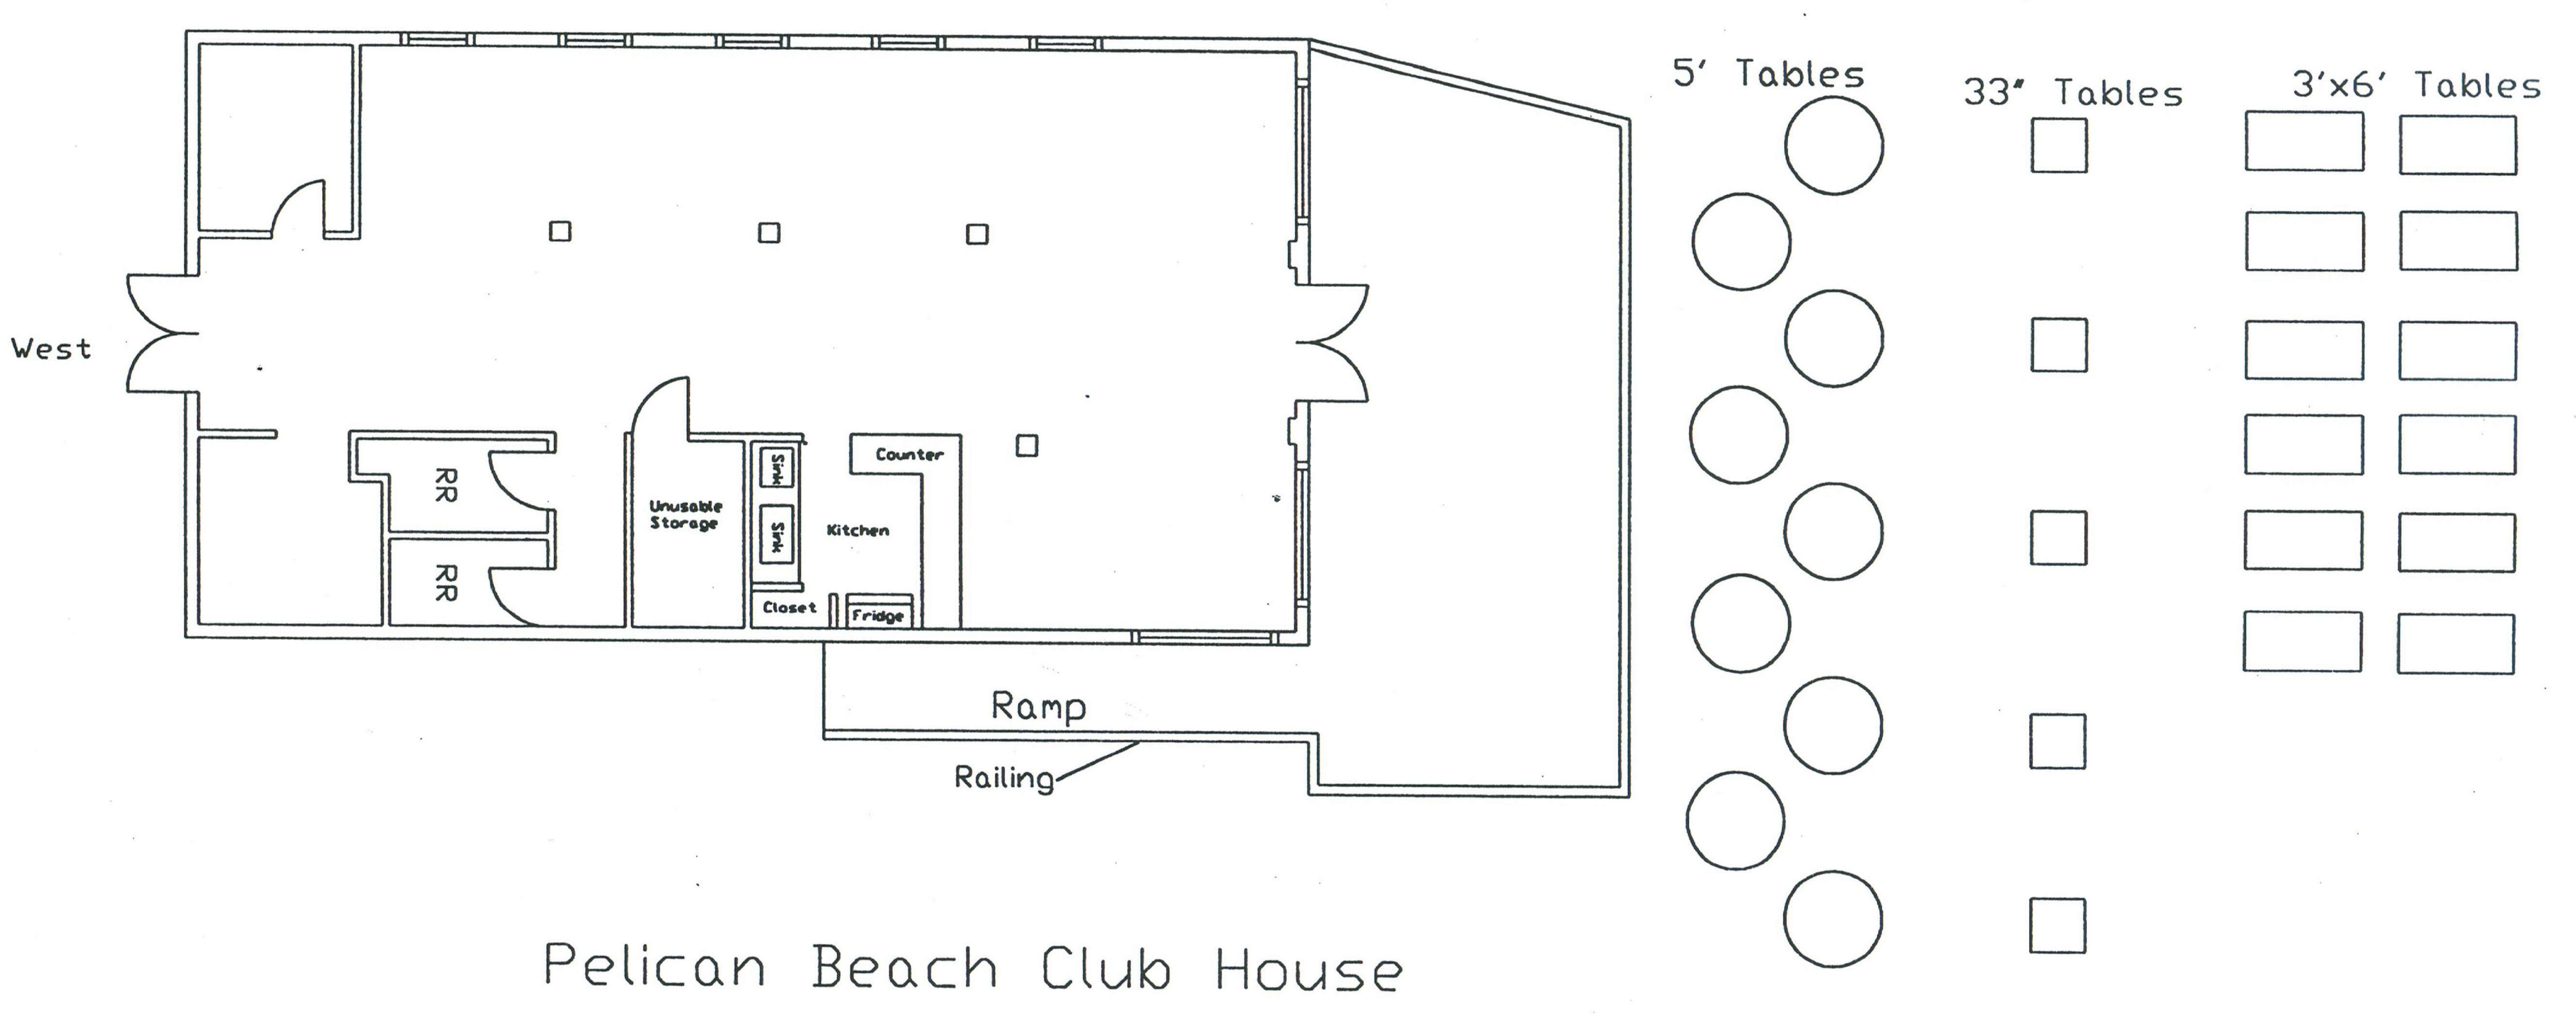

Layout Assistance

Cut out the circles, squares and rectangles shown below to help design seating for your gathering. The circles represent the 60" tables; squares the 33"x 33" card tables; and the rectangles the $36" \times 72"$ banquet tables. These symbols are drawn to scale with the interior drawing on this same page.

The quantities drawn are the exact amount of tables that are available at this facility. Use these shapes to arrange your seating in any combination you desire, but you must not exceed fire code of 70 persons. Keep clear of doorways and fire exits! Our 60" tables, as well as the $36" \times 72"$ banquet tables each seat 8 persons; the card tables will seat 4. Keep in mind, an activity such as a wedding where you will have a cake table, food tables, seating, and milling areas - you may need to lower your head count to around 60 for the comfort of your guests. Our tables and chairs can be used on the wooden deck (weather permitting) but cannot be moved to the sandy or beach areas.
